

Memorandum of Understanding Framework June 23<sup>rd</sup>, 2014

Fleming College and Yellow River Conservancy Technical Institute agree to explore collaborative opportunities in the following 6 areas.

**1. Student exchanging programs in the Corresponding Specialty areas of the two Colleges**

The specialty areas include, but are not limited to the following: water resources/quality/hydraulics, earth resources, pollution and geographical information systems.

**2. Short-term Teacher Exchange Program**

Explore possibilities for exchange of teachers between the two institutions.

**3. Studying Chinese and Culture Program**

Warmly welcome the teachers and students studying Chinese and experiencing Chinese culture in our institute during their holiday.

**4. Water/Wastewater Treatment Research**

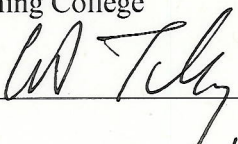

Explore possibilities for student and faculty sharing of knowledge and engaging/collaborating on research activities.

**5. Program Articulations**

Explore articulation opportunities in several program areas including water resources/quality/hydraulics, earth resources/restoration, pollution and geographical information systems

**6. Exchange of Teaching Resources**
