Canada

Dear David,

Letter in Recognition of Fleming College Diploma in Veterinary Technician

Hartpury University welcomes applications from students of Fleming College for entry onto the one year BSc (Hons) Bioveterinary Science programme delivered by Hartpury. This letter covers admissions from 1st September 2026 until 30th September 2031.

In order for Fleming Community College graduates to be guaranteed an offer of study on this programme, they must have achieved a pass grade in the Diploma in Veterinary Technician offered by Fleming Community College.

Under normal circumstances, such graduates will be admitted at Level 6 (Stage 3) of the BSc (Hons) Bioveterinary Science. This means that if they achieve their modules and programme in the usual timeline they will graduate from Hartpury in one further year of academic study.

Prospective students will be required to make an application through a direct application form, which can be accessed via the Hartpury website homepage www.hartpury.ac.uk. We anticipate that a large proportion of any applications will be from international students, therefore any acceptance will be contingent upon students successfully obtaining the necessary student visa from the UKVI.

Hartpury University request that they are informed of any changes that are made to the Fleming College programme named above in connection with content, delivery or modes of assessment as soon as these are identified. This will assist us in ensuring that programme compatibility and progression is maintained.

We very much look forward to working with Fleming College and welcoming your students to Hartpury in the future.

Yours sincerely

Professor Andy Collop
Vice-Chancellor
