

Course Experience Feedback

INTERPRETIVE GUIDE - FACULTY

The following reports have been prepared for the Course Experience Feedback results.

1) Faculty Course Summary Report (sent to your Fleming College email)

Course Experience Feedback responses have been grouped at the course/component level (i.e. CRSE 123 – Class/Lecture, CRSE 123 - Lab) for reporting. You will receive a separate email for **each** course component for which you received feedback responses, provided your **course** received 5 or more feedback responses in total (across all components).

I. Individual Statement Information – Faculty/Course Component Level:

- % = percentage of times each response option was selected for each statement
(calculated independently of non-response)
- # = number of times there was No Response to a statement

II. Overall Information – Faculty/Course Component, School and College Level:

The Overall Score was created by:

- 1) Summing responses to each option (Always, Often, Sometimes, Rarely, Never) for Questions 8 through 19 (excluding 9e)
- 2) Dividing the sums by the total number of responses for each option
- 3) Multiplying the result by 100 to produce % **(calculated independently of non-response)**

2) School Summary Report (sent to your Fleming College email)

I. Individual Statement Information – School Level:

- % = percentage of times each response option was selected for each statement
(calculated independently of non-response)
- # = number of times there was No Response to a statement

II. Overall Information – School and College Level:

The Overall Score was created by:

- 1) Summing responses to each option (Always, Often, Sometimes, Rarely, Never) for Questions 8 through 19 (excluding 9e)
- 2) Dividing the sums by the total number of responses for each option
- 3) Multiplying the result by 100 to produce % **(calculated independently of non-response)**

3) Overall College Summary Report (available [here](#))

I. Individual Statement Information – College level

% = percentage of times each response option was selected for each statement
(calculated independently of non-response)

= number of times there was No Response to a statement

II. Overall Information – College level:

The Overall Score was created by:

- 1) Summing responses to each option (Always, Often, Sometimes, Rarely, Never) for Questions 8 through 19 (excluding 9e)
- 2) Dividing the sums by the total number of responses for each option
- 3) Multiplying the result by 100 to produce % **(calculated independently of non-response)**

A number of error-checking procedures were established to ensure the accuracy of the results provided, including data review and a random sample check of the output.
