

# How to connect to “Fleming Residence” WiFi on your Android phone (Android Version 7.1.1)

1. Open the Wi-Fi settings on your device and tap on the “Fleming Residence” network to bring up the configuration window. Please configure using the settings on the following page.

\*Depending on your device these screens may look different.\*

**NOTE:** Not all android devices will require all of these settings. Some devices only require Identify and your Password to allow connection.

2. Please set the following settings for your device:

**EAP method: PEAP**

**Phase 2 Authentication  
MSCHAPV2**

**CA Certificate  
User system certificates**

**Domain  
peap.flemingc.on.ca**

**Identify  
Your Fleming username (ex: jsmith)**

**Anonymous Identity  
Leave this blank**

**Password  
Your Fleming password**

**You may now tap connect in the  
bottom right.**

3. Once you tap connect your device should say "Obtaining IP Address" once complete it should change to "Connected" and you should be online

The screenshot shows an Android application window titled "Students". The interface includes the following elements:

- Header:** "Students" title.
- EAP method:** A dropdown menu currently set to "PEAP".
- Phase 2 authentication:** A dropdown menu currently set to "MSCHAPV2".
- CA certificate:** A dropdown menu currently set to "Use system certificates".
- Domain:** A text input field containing "peap.flemingc.on.ca".
- Identity:** A text input field containing "SSFF10".
- Anonymous identity:** An empty text input field.
- Password:** A text input field with the password masked by ten dots.
- Bottom:** Two buttons labeled "CANCEL" and "CONNECT" in blue text.
