The following charts help to define the level of complexity involved in the analysis or identification of situations, information or problems, the steps taken to develop options, solutions or other actions and the judgement required to do so.

Please provide up to three (3) examples of analysis and problem solving that are regular and recurring and, if present in the position, up to two (2) examples that occur occasionally:

	#1 regular & recurring
Key issue or problem encountered.	Student account discrepancies
How is it identified?	In person, by phone, e-mail or third party. It may also be identified through regular maintenance query processes.
Is further investigation required to define the situation and/or problem? If so, describe.	Yes – discrepancies in the student account can be the result of numerous different transaction types; overnight batch processes, payments on the account; registration changes, changes charges etc each with their own impact. Information from several different sources need to be considered.
Explain the analysis used to determine a solution(s) for the situation and/or problem.	<p>The level of analysis required depends on the issue raised. It often requires a review of the account going back several semesters to current timeframe to review the transactions which have occurred on the student account Eg. Were there partial payments, missed charges, program changes status, changes in enrolments status (FT/PT/WD), fee adjustments, mis-aligned charges/payments.</p> <p>This analysis often requires the manipulation of the student account data through a query and organized in a pivot table to summarize and evaluate the data and transactions. The outcome could result in identifying issues that are directly related to charges on the student account or an improper registration transaction that needs to be corrected. .</p>

What sources are available to assist the incumbent finding solution(s)? (e.g. past practices, established standards or guidelines).

Incumbent is required understand a variety of different business processes that affect the student account. Most often the discrepancies are a result of a student's enrolment status or a program change which has to be re-aligned. Past practice and established business processing standards guide the majority of the work. College and provincial policies also guide the manner in which the work is conducted. Eg. FOI requirements. However the initial analysis requires understanding of business processes in which the incumbent is not directly involved.

The incumbent is required to run established queries and develop pivot tables to analyze and review the data; they are also required to manipulate/filter the data to isolate the issues.

**3. Analysis and Problem Solving**

**#2 regular & recurring**

Key issue or problem encountered

Payments received in-person, by phone, mail, wire payment or any web payment platform.

Is further investigation required to define the situation and/or problem? If so, describe.

Incumbent must determine if student is new or returning, if payment is on time or late and what payment option student is selecting along with payment eligibility and admission status

Explain the analysis used to determine a solution(s) for the situation and/or problem.

Prior to processing payment each student's account must be reviewed to determine what payment options are available to the student. If the payment provided does not match any of the payment option, further investigation required to determine what the best available option is for the payment received.

Confirmation of the student's admission/registration status must be determined before payment can be processed. Once the above has been confirmed, then the proper payment process must be initiated; cash, debit, credit card, web payment, wire transfer, sponsorship contract, OSAP contract, promissory note.

Based on timing, late charges may be applied to the account or payment declined as the student has lost status within their program.

What sources are available to assist the incumbent finding solution(s)? (eg. past practices, established standards or guidelines).

System tools such as queries and transaction posting, financial aid and admissions system information, college processes and practices, deferral contracts for OSAP and government students. RBC express & CIBC online payment platform.

Explain the analysis used to determine a solution(s) for the situation and/or problem.

Incumbent adds the appropriate withdrawal charges on the account based on the type of withdrawal. The method of refund is determined based on a review of the account and the initial transaction type. International refunds often require a wire trace to determine the status of the refund process. The incumbent is responsible for reviewing the initial refund transaction to determine if any processing or data errors took place and contacting the Finance office and intermediary bank for the trace.
