Position Description Form (PDF)

College: Sir Sandford Fleming	
Incumbent's Name:	
Position Title: HVAC Specialist	Payband:I
Position Code/Number (if applicable): S00105	
Scheduled No. of Hours40	
Appointment Type:x12 months	less than 12 months
Supervisor's Name and Title: Manager, College Facilities and	Projects
Completed by:	PDF Date: March 2007 Last Revision: March 06, 2009
Signatures:	
Incumbent: (Indicates the incumbent has read and understood the PDF)	Date:
Supervisor:	Date:

Instructions for Completing the PDF

- 1. Read the form carefully before completing any of the sections.
- 2. Answer each section as completely as you can based on the typical activities or requirements fo the position and not on exceptional or rare requirements.
- 3. If you have any questions, refer to the document entitled "A Guide on How to Write Support Staff Position Description Forms" or contact your Human Resources representation for clarification.
- 4. Ensure the PDF is legible.
- 5. Responses should be straightforward and concise using simple factual statements.

Position Summary

Provide a concise description of the overall purpose of the position.

Responsible for the continued maintenance and repair of all building equipment and related components by checking, inspecting, testing and trouble-shooting as necessary to ensure their efficient and continuous operation.

Duties and Responsibilities

Indicate as clearly as possible the significant duties and responsibilities associated with the position. Indicate the approximate percentage of time for each duty. Describe duties rather than detailed work routines.

T
Approximat e % of time annually*
15%
25%
10%

4. BAS Maintenance and Repair: Monitors and maintains BAS system and components on a daily basis, checking alarms and making adjustments as required. Ensures complete system functionality on a continuous basis. Liaises with BAS provider(s) as the main technical contact for the College, and advises Energy Management Specialist and/or technicians of any issues requiring attention.	20%
5. Repairs to Other Mechanical Equipment: Ensures that all plumbing is in working order by performing repairs or guiding and assisting in maintenance and repair. Repairs equipment such as motors, pumps, kitchen equipment. Maintains air compressors by performing regular checks of the air receivers, valves, strainers, lubricators, cleaners and automatic drains. Performs repairs and preventative maintenance as required. In addition, incumbent ensures that program related equipment is compliant and properly maintained, such as CAWT plumbing and control systems, Fish Hatchery equipment, and specific equipment at the Haliburton School of the Arts, such as blacksmith equipment, gas fired forges and control system for Glass Blowing program.	15%
6. General Maintenance: Performs basic facilities maintenance, including, but not limited to: Replacing/ adjusting/ repairing light bulbs/tubes, ceiling tiles, door hardware, furniture, window coverings. Assists with moving resources, grounds care and general facility operational needs during peak periods. May be required to assist at other campus locations periodically. Refers advanced issues to Facility Manager. Co-ordinates and consults with outside contractors for various projects and maintenance as required. Reviews engineered drawings and specifications as required. Provides supervisor with cost estimates and develops a materials list, sources suppliers and obtains quotes for most practical and cost effective approach.	10%
7. Safety Maintenance. Responds to emergency situations such as fire alarms and drills, building closure due to weather or building contingencies. Clears ice, snow, various debris, applying ice melt and shoveling as required at entrances and exits maintaining an acceptable level of safety. Ensures that fire equipment including hoses, cabinets, valves and fire alarm backup batteries are in good working order at all times. Performs scheduled fire alarm tests.	5%

To help you estimate approximate percentages: ½ hour a day is 7% 1 hour a 1 hour a day is 14% ½ day a month is 2% ½ day a week is 10%

1 hour a week is 3% 1 day a month is 4%

1 week a year is 2%

1. Education

A.	Check the box that best describes the minimum level of formal education that is required for the position and specify the field(s) of study. Do not include on-the-job training in this information.						
		Up to High School		1 year certifi	cate		2 year diploma
	X□	Trade certification		3 year diplor	na / degree		4 year degree or 3 year diploma / degree plus professional
							certification
		Post graduate degree (e.g. l	Mast	ters) or 4 year	s degree plus p	rofe	ssional certification
		Doctoral degree					
	Field	d(s) of Study:					
	Re	efrigeration and Air Condi	ioni	ng Systems	Mechanic (Tra	ade	Certification)
B.	form space be in	nal training or accreditation in ce provided specify the addit	n add tiona nd we	dition to and r Il requirement ould be acquii	ot part of the ed (s). Include onli red prior to the d	duca y the comi	(s), certification, qualification, tion level noted above and in the e requirement that would typically mencement of the position. Do ation.
		No additional requirements	3				
	Χ	Additional requirements ob course(s) of a total of 100		•	1. Honeywell applications t		I, CARE and all related ling.
					2. ODP (Ozo certificate.	ne [Depletion Prevention)
					3. Multistack	Chi	ller training
					4. Basics of F	all	Protection
					5. WHMIS tra	ainir	ng
					6. Self prope training (class		elevated work platform min.).
					7. First Aid tra	ainii	ng.
					8 Lift truck min.).	ope	rator certificate (class 4
					9. Confined s	bac	e entry training.

Support Staff PDF

- □ Additional requirements obtained by course(s) of a total between 101 and 520 hours
- X Additional requirements obtained by course(s) of a total of more than 520 hours

Gas Fitter 1 (Trade Certification)	

2. Experience

Experience refers to the minimum time required in prior position(s) to understand how to apply the techniques, methods and practices necessary to perform this job. This experience may be less than experience possessed by the incumbent, as it refers only to the minimum level required on the first day of work.

Check the box that best captures the typical number of year of experience, in addition to the necessary education level, required to perform the responsibilities of the position and, in the space provided, describe the type of experience. Include any experience that is part of a certification process, but only if the work experience or on-the-job training occurs after the conclusion of the educational course or program.

	Less than one (1) year	
	Minimum of one (1) year	
	Minimum of two (2) years	
	Minimum of three (3) years	
X	Minimum of five (5) years	Technical and mechanical diagnosis of all types of HVAC equipment. Equipment needs during seasonal changes. Interpreting engineering drawings. Microsoft software and programs (Internet Explorer, Windows, Word, Excel). Advanced/Expert knowledge of operation, trouble shooting, installation and maintenance of Building Automation Systems (BAS) software and related hardware (ex: Honeywell, Power Logic). General Facility maintenance. Self direction, working under pressure, within tight timelines, with minimal supervision. Customer service, resolving client issues.
	Minimum of eight (8) years	

3. Analysis and Problem Solving

This section relates to the application of analysis and judgement within the scope of the position.

The following charts help to define the level of complexity involved in the analysis or identification of situations, information or problems, the steps taken to develop options, solutions or other actions and the judgement required to do so.

Please provide up to three (3) examples of analysis and problem solving that are regular and recurring and, if present in the position, up to two (2) examples that occur occasionally:

	#1 regular & recurring
Key issue or problem encountered.	Independent judgement and decision making are paramount to this position. Position exercises judgement when performing regular inspections on all HVAC systems. Judgement is required when anticipating problems and responding with appropriate action.
How is it identified?	Usually complaint driven or equipment break down.
Is further investigation required to define the situation and/or problem?	Check to make sure equipment is operating. Some tear down of certain equipment may be required.
If so, describe.	Evaluates purchases/installations. Selects product in a routine situations by considering value, operation efficiency, quality of components and integration needs.
Explain the analysis used to determine a solution(s) for the situation and/or problem.	Diagnostic troubleshooting, involving a methodical approach through to a resolve.
What sources are available to assist the incumbent finding solution(s)? (eg. past practices, established standards or guidelines).	Manufacturers, dealers/suppliers internet and other like trades. Operating manuals, wiring schematics and incumbents past experience.

3. Analysis and Problem Solving

#2 regular & recurring

Key issue or problem encountered

The incumbent must have a high proficiency in trouble shooting, service and repair work on all types of heating ventilating and air conditioning equipment including Engineered Air roof to units, Lennox split Multizone units, Hydrotherm plus boilers, Coravac Heating, building refrigeration systems, gas fired equipment and HVAC controls such as Carrier VVT and VAV boxes, digital controls, Honeywell control BAS systems; Engineered Air CTRAC; VFD Drivers Energy management equipment; knowledge and experience in ordering replacement parts and equipment

How is it identified?

Equipment breakdown and complaints i.e. too hot/cold.

Is further investigation required to define the situation and/or problem? If so, describe.

Yes, equipment tear down to determine problem.

Explain the analysis used to determine a solution(s) for the situation and/or problem.

Diagnostic troubleshooting, look at Honeywell control system to determine problem area.

What sources are available to assist the incumbent finding solution(s)? (eg. past practices, established standards or guidelines).

Manufacturer, dealer/supplier, other related trades and internet. Service manuals.

#3 regular & recurring

Key issue or problem encountered

Building Automation System failure or defect.

Programming or re-programing required.

How is it identified?

During routine monitoring of BAS, alarms, reports of air quality irregularities from occupants, reported by IT.

Is further investigation required to define the situation and/or problem? If so, describe.

Source must first be determined, possibilities could be the HVAC equipment itself, software, or an IT issue.

Explain the analysis used to determine a solution(s) for the situation and/or problem.

BAS can self diagnose with aid of incumbent to a point, at which the incumbent would investigate outside interferences such as power issues or failures, mechanical equipment failures, server and controller issues, possibly created in or by IT department.

What sources are available to assist the incumbent finding solution(s)? (eg. past practices, established standards or guidelines).

Internal IT technicians, BAS provider, manuals, past practices, other Facilities staff.

3. Analysis and Problem Solving

Key issue or problem encountered

How is it identified?

Is further investigation required to define the situation and/or problem? If so, describe.

Explain the analysis used to determine a solution(s) for the situation and/or problem.

What sources are available to assist the incumbent finding solution(s)? (eg. past practices, established standards or guidelines).

#1 occasional (if none, please strike out this section)

Incumbent to service glass blowing forges to ensure that problems do not arise that could impact quality of glass.

No flow alarms.

Air quality issues.

Servicing, install/removal of blacksmith shop forges.

Alarm/complaint driven. Equipment breakdown. Alarm driven.

Visual inspection/ tear down. Visual inspection of pumps, floats and electrical.

Methodical diagnostic troubleshooting. Troubleshoot, electrical meters.

Manufacturer, dealer/supplier, other related trades and internet. Service manuals and past experience.

#2 occasional (if none, please strike out this section)

Key issue or problem encountered

How is it identified?

Is further investigation required to define the situation and/or problem? If so, describe.

Explain the analysis used to determine a solution(s) for the situation and/or problem.

Physical inspection, routine safety inspections, testing, reports/ complaints from occupants, BAS feedback.

Depending on nature of issue, independent testing and environmental consultants may be contracted.

Physical inspection may reveal obvious issues (Too hot/cold, burning smell, haze, etc.), otherwise BAS and mechanical diagnosis will be employed.

What sources are available to assist the incumbent finding solution(s)? (eg. past practices, established standards or guidelines).

On site testing equipment, service manuals, suppliers, contractors, manufacturers, environmental agencies/contractors.

4. Planning/Coordinating

Planning is a proactive activity as the incumbent must develop in advance a method of acting or proceeding, while coordinating can be more reactive in nature.

Using the following charts, provide up to three (3) examples of planning and/or coordinating that are regular and recurring and, if present in the position, up to two (2) examples that occur occasionally:

#1 regular & recurring

List the project and the role of the incumbent in this activity.

Mechanical repairs to HVAC equipment. The incumbent must have a high proficiency in troubleshooting, service and repair procedures on all types and makes of heating ventilation and air conditioning equipment including Engineered Air, Airwise, Trane and Lennox single and multizone air handling units, closed loop boiler and chiller systems, infrared heating, building refrigeration systems, gas fired equipment.

What are the organizational and/or project management skills needed to bring together and integrate this activity?

Incumbent must be able to prioritize work effectively, multi-task, and work under pressure to meet strict deadlines.

List the types of resources required to complete this task, project or activity.

Specialized tools and equipment, testing devices & meters. Service manuals and engineering or as-built drawings and schematics. Log Books.

How is/are deadline(s) determined?

Room or area usage/booking. Work order generated by Supervisor. Independent knowledge/ experience of duration to affect repair.

Who determines if changes to the project or activity are required? And who determines whether these changes have an impact on others? Please provide concrete examples.

Changes may be determined by incumbent and/ or Supervisor. Impact on others may be determined by Facilities Director or Operations Officer. Example; if a procedure is rescheduled or delayed, it may affect users of a particular room or area of the building. Impacts class schedule, independent bookings, etc.

4. Planning/Coordinating

List the project and the role of the incumbent in this activity.

What are the organizational and/or project management skills needed to bring together and integrate this activity?

List the types of resources required to complete this task, project or activity.

How is/are deadline(s) determined?

Who determines if changes to the project or activity are required? And who determines whether these changes have an impact on others? Please provide concrete examples.

List the project and the role of the incumbent in this activity.

What are the organizational and/or project management skills needed to bring together and integrate this activity?

List the types of resources required to complete this task, project or activity.

How is/are deadline(s) determined?

Who determines if changes to the project or activity are required? And who determines whether these changes have an impact on others? Please provide concrete examples.

#2 regular & recurring

Preventative Maintenance. Incumbent co-ordinates and facilitates cleaning and/or replacement of normal wear items such as belts, filters, strainers, driers, spark plugs, burners and condenser coils.

Incumbent plans for seasonal changes, coordinates casual help for large projects (filter changes, coil cleaning), determines inventory and advises special order quantities, calculates timelines.

Inventory, casual help, other Facilities staff, Log books, special equipment.

Seasonal changes, availability of casual help, building occupancy timing (break weeks), availability of product, discussion between Incumbent/ Supervisor.

Incumbent and/ or Supervisor.

#3 regular & recurring

Building Management System service and maintenance. Incumbent must have concise knowledge of electronic HVAC controls such as DDC, Eng-A CTrac, Trane, VAV systems, etc. Must have clear understanding of software functions and sequences of operation.

Computer navigation skills, scheduling, ability to read and understand mechanical drawings, blueprints and graphics.

PC, network, riser diagrams and mechanical drawings.

Daily requirements, monthly schedule of technical upgrades & service by outside contractor (Honeywell)

Incumbent and/ or Supervisor.

Changes to settings for increased cooling/heating/ventilation impact large events such as Open House.

4. Planning/Coordinating

List the project and the role of the incumbent in this activity.

What are the organizational and/or project management skills needed to bring together and integrate this activity?

List the types of resources required to complete this task, project or activity.

How is/are deadline(s) determined?

Who determines if changes to the project or activity are required? And who determines whether these changes have an impact on others? Please provide concrete examples.

#1 occasional (if none, please strike out this section)

Assessment of HVAC equipment needing replacement. Consistently makes judgement on the best course of action - example; which HVAC units place the College most at risk in terms of potential to fail, ability to get parts, and operating in a safe manner.

Generally must judge which units to monitor on a consistent basis In terms of chronic issues. Must forecast consequences to the area serviced.

Experience and expertise in the trade(s), fellow tradespeople, ability to estimate projected life spans etc.

Usually by condition of equipment, availability of funds, peak periods of use of building.

Incumbent and/ or Supervisor, consultants, Facilities Director.

4. Planning/Coordinating

List the project and the role of the incumbent in this activity.

What are the organizational and/or project management skills needed to bring together and integrate this activity?

List the types of resources required to complete this task, project or activity.

How is/are deadline(s) determined?

Who determines if changes to the project or activity are required? And who determines whether these changes have an impact on others? Please provide concrete examples.

#2 occasional (if none, please strike out this section)

Equipment upgrading for Health & Safety, Fire or building code requirements.

Incumbent makes recommendations, designs and/or builds and installs components.

Recommends IAQ testing, duct cleaning etc.

Re-designs equipment as needed to suit specific needs.

Incumbent co-ordinates proposal, gathers quotes, supervises progress of project.

Good knowledge of manufacturers and subtrades, OH&S Act, TSSA or other governing body regulations.

Incumbent will base completion dates on College activities/schedules, and governing body required timelines.

Supervisor/Incumbent/consultant or contractor.

A new HVAC upgrade may create a moisture problem due to design/age of existing building, resulting in mould issues, impacting occupants.

Alternative air handling solutions required.

5. Guiding/Advising Others

This section describes the **assigned responsibility** of the position to guide or advise others (e.g. other employees, students). Focus on the actions taken (rather than the communication skills) that directly assist others in the performance of their work or skill development.

Though Support Staff cannot formally "supervise" others, there may be a requirement to guide others using the incumbent's job expertise. This is beyond being helpful and providing ad hoc advice. It must be an assigned responsibility and must assist or enable others to be able to complete their own tasks.

Check the box(es) that best describe the level of responsibility assigned to the position and provide an example(s) to support the selection, including the positions that the incumbent guides or advises.

Regular & Recurring	Occasional	Level	Example
X		Minimal requirement to	CAWT/Glassblowing/Blacksmithing.
		guide/advise others. The incumbent may be required to explain procedures to other employees or students.	Supervisor/Technicians/Facility's staff
X		There is a need for the incumbent to demonstrate correct processes/ procedures to others so that they can complete specific tasks.	Demonstrates the correct process for operating the Building Automation System (BAS) for HVAC Technicians.
	a course of action or makes		Glassblowing/Blacksmithing/CAWT/ Hatchery.
		decisions so that others can perform their day-to-day activities.	Honey well expert – advising other HVAC staff when required
			Demonstrates/instructs/supervises/ assists other Facilities staff and casual help (students) on various projects.
		The incumbent is an active participant and has ongoing involvement in the progress of others with whom he/she has the responsibility to demonstrate correct processes/procedures or provide direction.	

_						_

	of action or making necessary	i !
	decisions to ensure the tasks	i I
	are completed.]

6. Independence of Action

Please illustrate the type of independence or autonomy exercised in the position. Consideration is to be given to the degree of freedom and constraints that define the parameters in which the incumbent works.

What are the instructions that are typically required or provided at the beginning of a work assignment?				
Regular and Recurring	Occasional (if none, please strike out this section)			
From daily rounds generate work order through plant and property office for needed service and repairs detected. Work order issued – with problem stated. Must be investigated and evaluated as to most economic solution and then installed, built or repaired.				

What rules, procedures, past practices or guidelines are available to guide the incumbent?				
Regular and Recurring	Occasional (if none, please strike out this section)			
Principles and technologies learned through post secondary education. Reference to course textbooks; operation and maintenance manuals for equipment, machinery to determine or try to evaluate the problem and possible solution. Years of experience working on above note systems and equipment will be a valuable asset.				

How is work reviewed or verified (eg. feedback from others, work processes, Supervisor)?				
Regular and Recurring Occasional (if none, please strike out this section)				
Supervisor does not regularly check for completion, other than safety issues. Work is reviewed by discussions on an ongoing basis, e.g. getting OK for money to repair.				

6. Independence of Action

Describe the type of decisions the incumbent will make in consultation with someone else other than the Supervisor?				
Regular and Recurring Occasional (if none, please strike out this section)				
Working with other facilities staff while on other campuses i.e. Haliburton				

Describe the type of decisions that would be decided in consultation with the Supervisor.				
Regular and Recurring Occasional (if none, please strike out this section)				
Approval of payment for parts etc. Getting P.O.s. Approval on quotes.				

Describe the type of decisions that would be decided by the incumbent.				
Regular and Recurring Occasional (if none, please strike out this section)				
First thing daily visit every building HVAC system to confirm proper operation and prioritize repairs needed. Daily equipment maintenance. Equipment repair. Continuous for all of the above.				

7. Service Delivery

This section looks at the service relationship that is an assigned requirement of the position. It considers the required manner in which the position delivers service to customers. It is not intended to examine the incumbent's interpersonal relationship with those customers and the normal anticipation of what customers want and then supplying it efficiently. It considers how the request for service is received and the degree to which the position is required to design and fulfil the service requirement. A "customer" is defined in the broadest sense as a person or groups of people and can be internal or external to the College.

In the table below, list the key service(s) and its associated customers. Describe how the request for service is received by the incumbent, how the service is carried out and the frequency.

Information on the service		Customer	Frequency
How is it received?	How is it carried out?		(D, W, M. I)*
Receives work orders which indicate problem i.e. too hot/too cold.	Follows work orders to investigate problem and make necessary repairs.	College Community	D
Receives specific direction from supervisor.	Follows direction through to completion of request.	College Community	W
Receives request to assist other campuses.	Follows through with request in going to campus.	College Community	1 / W
Receives request to assist other facilities staff.	Works with other facilities staff through to completion of task.	Facilities Staff	W
Receives request to assist other departments i.e. CAWT/Hatchery	Works through to completion.	Programs	W

^{*} D = Daily W = Weekly M = Monthly I = Infrequently Final, March 2009

8. Communication

In the table below indicate the type of communication skills required to deal effectively with others. Be sure to list both verbal (e.g. exchanging information, formal presentations) and written (e.g. initiate memos, reports, proposals) in the section(s) that best describes the method of communication.

Communication Skill/Method	Example	Audience	Frequency (D, W, M ,I)*
Exchanging routine information, extending	Answer questions to help with problem situations	Teachers	W
common courtesy	Answer questions, unlock doors etc.	Students	
	Assist and direct	Public	
Explanation and interpretation of	Repair machinery or answer questions	Caretakers	I / W
information or ideas	Purchase installation and repairs	Suppliers	D
	Explain Motor repairs needed Assist and direct	Service centres Service contractors	w w
	Approvals to proceed with quote Obtaining best price for parts and equipment	Supervisor Dealers/suppliers, contractors	w w
Imparting technical information and advice	Specific projects involving HVAC or plumbing. Refrigeration, glassblowing and blacksmithing. Changing filters	Faculty Supervisor Technicians Facilities staff	I / W W I
Instructing or training			
Obtaining cooperation or consent			
Negotiating			

^{*} D = Daily W = Weekly

M = Monthly

I = Infrequently

9. Physical Effort

In the tables below, describe the type of physical activity that is required on a regular basis. Please indicate the activity as well as the frequency, the average duration of each activity and whether there is the ability to reduce any strain by changing positions or performing another activity. Activities to be considered are sitting, standing, walking, climbing, crouching, lifting and/or carrying light, medium or heavy objects, pushing, pulling, working in an awkward position or maintaining one position for a long period.

Physical Activity	Frequency (D, W, M, I)*	Duration			Ability to reduce strain		
		< 1 hr at a time	1 - 2 hrs at a time	> 2 hrs at a time	Yes	No	N/A
Walking	D	Х			х	 	
Pulling or lifting light and medium weights	D	Х			Х		
Pulling lifting heavy weights	 	Х	 	 	 	Χ	
Climbing	D	Х	 	 		Х	
Crouching	D	Х		 	Х		
Standing	D	Х			Х	†	

D = Daily W = Weekly M = Monthly I = Infrequently

$$M = Monthly$$

If lifting is required, please indicate the weights below and provide examples.

- X Light (up to 5 kg or 11 lbs)
- X Medium (between 5 to 20 kg or 11 to 44 lbs)
- X Heavy (over 20 kg or 44 lbs)

Tools and parts.

Step ladders, pumps and motors.

Pumps, motors and compressors.

10. Audio Visual Effort

Describe the degree of attention or focus required to perform tasks taking into consideration:

- the audio/visual effort and the focus or concentration needed to perform a task and the duration of the task, including breaks (eg. up to 2 hours at one time including scheduled breaks)
- impact on attention or focus due to changes to deadlines or priorities
- the need for the incumbent to switch attention between tasks (eg. multi-tasking where each task requires focus or concentration)
- whether the level of concentration can be maintained throughout the task or is broken due to the number of disruptions

Provide up to three (3) examples of activities that require a higher than usual need for focus and concentration.

Activity #1	Frequency (D, W, M, I)*	Average Duration			
		Short < 30 mins	Long up to 2 hrs	Extended > 2 hrs	
Welding	M	Х			
Can concentration or focus be maintained throughout the duration of the activity? If not, why? X Usually Radio calls D No					

Activity #2	Frequency (D, W, M,	A	verage Duratio	n
		Short < 30 mins	Long up to 2 hrs	Extended > 2 hrs
Adjustment to air handling equipment	D	 	X	
Can concentration or focus be maintained throughout the duration of the activity? If not, why? X Usually Radio calls No				

Activity #3	Frequency	Average Duration			
	(D, W, M, I)*	Short < 30 mins	Long up to 2 hrs	Extended > 2 hrs	
Troubleshooting VAV and VVT heating/cooling digital controls	D		Х		
Can concentration or focus be maintained throughout the duration of the activity? If not, why? X Usually Radio calls No					

* D = Daily W = Weekly M = Monthly I = Infrequently

11. Working Environment

Please check the appropriate box(es) that best describes the work environment and the corresponding frequency and provide an example of the condition.

Working Conditions	Examples	Frequency (D, W, M, I)*
□ acceptable working conditions (minimal exposure to the conditions listed below)		
X accessing crawl spaces/confined spaces	Confined HVAC access between pipes and duct work.	1
□ dealing with abusive people		
□ dealing with abusive people who pose a threat of physical harm		
X difficult weather conditions	Working outside n summer heat and winter cold	W
X exposure to extreme weather conditions	Working on roof top for long periods of time.	W
X exposure to very high or low temperatures (e.g. freezers)	Walk-in coolers/freezers and glassblowing furnaces.	M
X handling hazardous substances	Working with natural or propane gas, Loopanol 2 or Glycol and refrigerant sewage.	I
X smelly, dirty or noisy environment	Running HVAC equipment and working in CAWT vaults.	D
X travel	Intercampus travel and supply purchases.	w
X working in <u>isolated</u> or crowded situations	Working alone in mechanical rooms or on roof tops.	D
□ other (explain)		

^{*} D = Daily M = Monthly W = Weekly I = Infrequently
