### 3. Analysis and Problem Solving

This section relates to the application of analysis and judgement within the scope of the position.

The following charts help to define the level of complexity involved in the analysis or identification of situations, information or problems, the steps taken to develop options, solutions or other actions and the judgement required to do so.

Please provide up to three (3) examples of analysis and problem solving that are regular and recurring and, if present in the position, up to two (2) examples that occur occasionally:

#### #1 regular & recurring

Key issue or problem encountered.

A student is in their final semester and requires specific courses within their course load to meet diploma requirements.

How is it identified?

The student has tried through self service to select the courses of interest but was not able to do so and inquires in the Registrar's Office.

Is further investigation required to define the situation and/or problem? If so, describe.

Yes. The incumbent will have to determine which courses are available for which programs and if they can be scheduled without conflicts. Confirmation of course requirements to satisfy diploma completion is required as well as verification of any prerequisite standards.

Explain the analysis used to determine a solution(s) for the situation and/or problem.

Clarification of diploma needs as understood by the student may have to be verified through review of their academic history to ensure they are making the correct decision to add courses. A review of the scheduled course blocks will provide details of courses available for each program. There may be circumstances where a schedule over-ride will have to be employed to allow courses which are in conflict to be scheduled Academic Chair approval required.

What sources are available to assist the incumbent finding solution(s)? (eg. past practices, established standards or guidelines).

Student record, schedule of classes, past practice, college calendar and website – level/load rules by program in system.

### 3. Analysis and Problem Solving

#### #2 regular & recurring

Key issue or problem encountered

Student wishes to transfer to another program.

How is it identified?

A student has attended a week of classes and has decided that a different program would be more appropriate. They make an inquiry in the Registrar's Office.

Is further investigation required to define the situation and/or problem? If so, describe.

Yes. Incumbent will have to get further details about the program that the student wishes to transfer to. Does the student meet the admission requirements; is there still space in the program; are there still spaces in the program courses; are there tuition differences. Does the program or Academic Chair allow for late entry into the program?

Explain the analysis used to determine a solution(s) for the situation and/or problem.

The incumbent through one-on-one discussion with the student will determine the nature of the request for program change. If the student meets the admission requirements and there is space in the program, the incumbent will have the student complete the necessary paperwork to initiate the program transfer transaction. The student will be made aware of any differences in tuition fees and or duration of program, etc. so that the student can make an informed choice. The student's current courses will have to be dropped and their program withdrawn and a new program/plan created associated with the current term activation record. If there are core and elective course choices required as part of the new program choice, the incumbent is required to guide the student through the selection process.

What sources are available to assist the incumbent finding solution(s)? (eg. past practices, established standards or guidelines).

Program calendar, academic regulations, College website, schedule of classes, Program of Studies, level/load rules; established practices and documented system procedures.

**#3 regular & recurring**

Key issue or problem encountered

A transcript request is received for a historical student. The student does not know their student number so the identity of the student needs to be determined.

How is it identified?

A request form is received.

Is further investigation required to define the situation and/or problem? If so, describe.

Yes. The incumbent must search for the student record and confirm the identity of the requestor per FIPPA guidelines.

Explain the analysis used to determine a solution(s) for the situation and/or problem.

The incumbent will search the current files using first name, last name and birthdate. If the student is not matched the historical and micro fiche records are searched. This task requires extreme care to ensure the correct transcript is produced.

What sources are available to assist the incumbent finding solution(s)? (eg. past practices, established standards or guidelines).

If the student cannot be identified the incumbent will contact the student for further details.

### 3. Analysis and Problem Solving

**#1 occasional** (if none, please strike out this section)

Key issue or problem encountered

Student is faced with a withdrawal from a semester of a program and needs to determine how best to maintain OSAP eligibility for future semesters.

How is it identified?

Student has contacted the Office of the Registrar front counter staff.

Is further investigation required to define the situation and/or problem? If so, describe.

Calculation of the program level load required to maintain OSAP eligibility; determination of previous academic issues with OSAP. Incumbent must determine if student will maintain OSAP funding eligibility. Determine if the student has a documented disability and can be enrolled in a reduced course load. If the student plans to return to their program of study, will they have the required academic prerequisites if they withdraw. Verify that the classes that the student requires are offered in the semester that the student indicates that they wish to attend. If the student is not returning to the same program of study, incumbent must review the number of programs taken and determine if a restriction is warranted due to multiple program changes.

Explain the analysis used to determine a solution(s) for the situation and/or problem.

Analysis is completed by using Evolve tables to calculate the level load of the program as it relates to OSAP eligibility. Consulting the curriculum of the program as listed on the Fleming College website and referencing the required courses and prerequisites, and number of program changes. Incumbent will thoroughly consult both OSAP on-line systems to verify student's continued eligibility to receive OSAP assistance.

What sources are available to assist the incumbent finding solution(s)? (eg. past practices, established standards or guidelines).

OSAP processing guidelines, Evolve systems, past practice, knowledge of Records processes and Admissions internal application process, Student Accounts functions. Refer student to Counsellor if situation requires a disability education plan.

#### 4. Planning/Coordinating

Planning is a proactive activity as the incumbent must develop in advance a method of acting or proceeding, while coordinating can be more reactive in nature.

Using the following charts, provide up to three (3) examples of planning and/or coordinating that are regular and recurring and, if present in the position, up to two (2) examples that occur occasionally:

	#1 regular & recurring
List the project and the role of the incumbent in this activity.	Incumbent is required to coordinate daily task priorities to ensure that transaction processing is kept up to date. I.e. Exemption requests, transcript processing, confirmation of enrolment, course withdrawals, program transfers.
What are the organizational and/or project management skills needed to bring together and integrate this activity?	The incumbent must be cognizant of the deadlines established in the academic schedule so that critical deadline dates are met and tasks must be prioritized accordingly. This is a difficult task due to the front counter nature of the job and continuous customer interaction. The incumbent must be cognizant of the downstream implications on student records and OSAP standing arising from various student transactions.
List the types of resources required to complete this task, project or activity.	Student information system, student financials, documented system procedures.
How is/are deadline(s) determined?	The academic schedule sets out the dates by which the majority of transaction processing is to be completed in addition to the annual planning schedule for the Registrar's Office.
Who determines if changes to the project or activity are required? And who determines whether these changes have an impact on others? Please provide concrete examples.	The Associate Registrar in consultation with the Manager of Records may require changes to the priorities set given current circumstances (i.e. volume of processing, system needs, student impact). The Registrar's team determines the impact. Delays in transaction processing can have a negative impact on students i.e. delay in receiving tuition refunds, missed course drop dates, errors in level progression due to incomplete transfer credit processing.

## 7. Service Delivery

This section looks at the service relationship that is an assigned requirement of the position. It considers the required manner in which the position delivers service to customers. A "customer" is defined in the broadest sense as a person or groups of people and can be internal or external to the College.

In the table below, list the key service(s) and its associated customers. Describe how the request for service is received by the incumbent, how the service is carried out and the frequency.
