Policy Statement
Fleming College is accountable for evaluating student achievement based on established standards and for communicating these results. The assigning of college defined grades formalizes a student's status within a course and/or program and provides a basis for decisions regarding recognition of excellence, promotion, academic probation and withdrawal.

This policy identifies the scope, defines relevant terms, and outlines the general principles of grade designation and decisions that affect student status. This policy applies to all credit / non-credit students of Fleming College.

Definitions/Acronyms
Prior Learning Assessment (PLAR): A process that gives the student an opportunity to obtain academic credit for one or more courses in a certificate or diploma. The student is required to demonstrate that they have acquired the necessary skills and knowledge according to the PLAR policy.

GPA: Grade Point Average. A calculated and weighted term average which is calculated by dividing the total number of grade points earned from final grades reported on the student transcript by the total number of instructional hours.

Cumulative GPA: The Cumulative GPA Is calculated for each term of study by dividing the total number of grade points earned to date by the total number of course hours.

Program GPA is calculated at program completion by dividing the total number of grade points earned by the total number of instructional hours for the program classes.

Operating Procedure

1.0 Grade Determination

1.1 The method and timeline of course evaluation will be made available to the student in an approved course outline prior to the first week of formal classes. The evaluation scheme will state, as a minimum, the portion of final marks assigned to casework, laboratory or fieldwork reports, assignments and tests. The evaluation methods may be changed after discussion between the professor and students with the approval of the appropriate Dean or designate. Any change must be given as an addendum to the course of study and reissued to the students. Note: For certain web-based or alternate delivery courses, the timelines for course evaluations may differ from those of traditional classroom methods. In all such cases, please refer to the course outline.
1.2 In determining a student's final grade, evaluation activity for the entire semester is taken into consideration. This may include (but is not restricted to) tests, essays, laboratory and field work, reports, other assignments, and participation in seminars or discussion groups.

1.3 Course grades will be made available to students, by faculty, within two weeks of the submission date. The rare exception to this timeframe will be approved by the Dean or designate and documented in the course outline. Final grades will be made available to the Office of the Registrar upon completion of the course.

1.4 All students will be given the opportunity to review any evaluation activity. Faculty may either return work to the students or retain work for a period of one year.
